BEFORE YOU TURN THE PAGE

A gift is judged in the first three seconds.

It is the weight of the box in the hand, the lid that slides down slowly on its own, the notebook that opens flat on the first try. Nobody reads the card before they have already decided what they think.

Every piece in these pages can carry your identity by engraving, printing, embossing or debossing, and every one is chosen so the moment it is opened says what a label never could.

When you find something you like, send us its item code. We will come back with samples, branding options and lead times for your quantity.
